

August 2, 2014

Dear Editor,

Please find enclosed the edited manuscript in Word format  
(File name: 11804-review.doc).

**Title:** Pancreatic carcinosarcoma: first literature report on CT imaging  
A case report and review of the literature

**Author:** Hong-Yuan Shi, Jing Xie, Fei Miao

**Name of Journal:** *World Journal of Gastroenterology*

**ESPS Manuscript NO:** 11804

The manuscript has been improved according to the suggestions of reviewers:  
1 Format has been updated

2 Revision has been made according to the suggestions of the reviewer

(1) In the first clinical evaluation when the lesion was initially detected and diagnosed as a mucinous tumor, why did not the patient was to surgery? — Because the patient refused to have the operation and asked for follow-up.

(2) Please comment in the discussion the utility of EUS and EUS-FNA for the approach of cystic lesions in the pancreas. — I think this manuscript mainly discusses the use of CT in the diagnosing the pancreatic, and so EUS and EUS-FNA are beyond the scope of this article.

(3) Please provide arrowhead to the images in order to reflect the areas of interest. — I have completed this task.

3 References and typesetting were corrected

Thank you again for publishing our manuscript in the *World Journal of Gastroenterology*.

Sincerely yours,

**Hong-Yuan Shi**, MD, PhD
