

August 30, 2014

Dear Editor,

Please find enclosed the edited manuscript in Word format.

Title: Significance of low level infliximab in the absence of anti-infliximab antibodies

Authors: Bella Ungar, Adi Anafy, Henit Yanai, Yulia Ron, Miri Yavzori, Orit Picard, Ella Fudim, Ronen Loebstein, Uri Kopylov, Yehuda Chowers, Iris Dotan, Rami Eliakim, Shomron Ben-Horin

Name of Journal: World Journal of Gastroenterology

ESPS Manuscript NO: 13168

The manuscript has been improved according to the suggestions of the reviewers - format has been updated and references and typesetting were corrected. All the editor's comments have been answered as well. Of note, figures 5 and 6 could not be decomposed as these are Kaplan - Meier survival curves, which have been imported from the Medcalc statistical software, as elaborated on at the Methods section. In addition, as one of the two senior authors (Ben-Horin S) is a native English speaker, a language-editing certificate was deemed unnecessary. Please inform us of any specific pertinent language-related comments and we will amend accordingly.

Thank you again for considering our manuscript for publication in the World Journal of Gastroenterology.

Sincerely yours,

Bella Ungar & Shomron Ben-Horin
