

Dear Reviewer's

Thank you for giving us your valuable comment.  
We respond the reviewer's comment point-to-point just like below.

Reviewer's comment

Reviewer00181182

This review on sentinel node navigation surgery in gastric cancer covers the relevant aspects and appropriately discusses the recent developments. The manuscript can be published in its present form, however in the "future perspective" section, it is recommended to mention the SENORITA trial (NCT01804998), which is currently conducted in Korea and will have further impact on this matter in the future.

<Answer>

We added the description about the SENORITA trial in the "future perspective" section (Page 11, Line 18-22, underlined).
