Dear Editor,

Please find enclosed the edited manuscript in Word format (file name 23711-Revised manuscript.doc).

Title: Ileo-right hemi-colonic cervical pull-up on a non-supercharged ileocolic arterial pedicle: A technical and case report

Author: Andreas R. R. Weiss, Christina Hackl, Yorick Soeder, Hans J. Schlitt, Marc-H. Dahlke

Name of Journal: *World Journal of Gastroenterology*

ESPS Manuscript NO: 23711

The manuscript has been improved according to the suggestions of reviewers:

1 Format has been updated

2 Revision has been made according to the suggestions of the reviewer

(1) This is a very good clinical case, well written and valuable. I only have two comments: - There are some vocabulary mistakes in the manuscript. - At the end of the case presentation; authors stated that the patient was in a good clinical state with no major digestive problems. It seems surprising for a patient with no esophagus, stomach, duodenum, pancreas and a major part of his colon to be in a good nutritional state with no digestive concerns. Would the authors be more specific about that by providing objective data about the patient nutritional state

(2) Overall, it is a globally good written case-report with an interesting topic. Since it is an operational method not performed before - it is worth to assess. It is acceptable for publication. Thank you in advance

3 References and typesetting were corrected

Thank you again for publishing our manuscript in the *World Journal of Gastroenterology*.

Sincerely yours,

Andreas R.R. Weiss, MD
