

Dear Dr Qi,

Please find enclosed a revised copy of our paper “**Integration of genome scale data for identifying new players in colorectal cancer**” by Sokolova V, et al. As suggested by one reviewer, we have added a short paragraph on what is known about lncRNAs and ceRNAs in colorectal cancer.

We have revised the language of the manuscript, subjected the manuscript to analysis of plagiarism and the final title to Google Scholar search. We have attached the final version locked after language editing (that has removed all the sentences with plagiarism) and a word file where changes have been highlighted in yellow. Finally we registered an audio core tip and attached all the documents required.

Sincerely,
Manuela Gariboldi, PhD
