Title: Glycoproteins and glycoproteomics in pancreatic cancer

Response Reviewer's code: 02445638

We thank the reviewer for the comments on this work. The reviewer's points are well taken and we have revised the manuscript accordingly. The heading of the original section of "Analysis of glycoproteins in pancreatic cancer bodily fluids" has been changed to "Discovery of glycoprotein biomarkers in pancreatic cancer" per the reviewer's suggestion. The whole section has also been revised extensively to improve the clarity. However, we are regret that we were not able to provide a comprehensive table to list all the glycoprotein biomarkers with their clinical pros and cons. This is largely due to the fact that 1) currently CA 19-9 is the only clinical biomarker for pancreatic cancer and 2) there is limited information available in the literature about clinical evaluation of other glycoprotein biomarker candidates.
