

Dear editor Yu and viewers:

Thank you very much for your advice on our manuscript entitled “The effect of switching from treatment with NAs to pegylated interferon  $\alpha$ -2a on virological response and serological response in chronic hepatitis B patients”.( **Manuscript NO: 27216**). Your comments and suggestions were constructive and positive.

And we have revised the manuscript according to the comments and suggestions of reviewers, and responded, point by point, to the comments as listed below. We have highlighted the amendments (in red) font in the revised manuscript in full edition. Firstly, abstract, section Aims and section conclusion. We have used inappropriate expression and we have revised manuscript according to reviewers. Secondly, in the introduction, we use “NAs almost produce drug resistance” instead of “ NAs all produce drug resistance”. Even though it is a short time to market of Tenofovir, Tenofovir therapy the resistance rate is low in recent research. Lastly, we should have checked the upper case or mixed case in the manuscript.

Thank for you and reviewers’ comments. We would like to re-submit this revised manuscript to World Journal of Gastroenterology, and hope it is acceptable for publication in the journal.

Looking forward to hearing from you soon with kindest regards,

Yours sincerely,

Xiao-Guang Ye, Li-Ting He,
