COMMENTS TO AUTHORS

The paper clearly develops the complex metabolic activity of NO during HIRI with the updated references and correct subdivision of each specific section. In my opinion the study should be regarded as a well written scientific book's chapter. If this type of study is part of the editorial choices of the journal, it can be certainly published.

Answer: Many thanks for your kind opinions. According to your suggestion, this manuscript has been revised for language and grammar by Darleen ,an editor from Enago (www.enago.cn) .We hope the language in our paper can conform to the standard of publishing in World Journal of Gastroenterology. Thank you!
