

Comments from reviewer:

The reviewer comments are concluded as follows:

1. Key words. In key words added inflammation and A20.
2. Illustrations and tables. The quality of figure 4 and 5 should be better and the legend complete for abbreviations.

Reply: Thank you for your suggestion. We add inflammation and A20 in key words, improve the quality of figure 4 and 5, and write full names instead of abbreviations in the legend.
