

Dear reviewers,

Thank you for your positive review of our article titled: *UNDERSTANDING THE IMMUNE RESPONSE AND THE CURRENT LANDSCAPE OF IMMUNOTHERAPY IN PANCREATIC CANCER*.

Reviewer#1:

Specific Comments to Authors: Very well written manuscript. Needs a spell check as there are a few spelling errors. Side effects of immunotherapy, checkpoint inhibitor therapies may be significant and though this is not the primary focus of the article the authors could add a line or two when they talk about the clinical trials of these therapies.

Science editor:

5 Issues raised: (1) The authors did not provide the approved grant application form(s). Please upload the approved grant application form(s) or funding agency copy of any approval document(s).

Attending to your suggestions, we have decided to add some information about the immunotoxicity reported in the clinical trials selected in our manuscript. Also, we have meticulously reviewed the spelling. Additionally, we attach the documents requested.

We hope these changes are suitable for your final acceptance and publication.

Sincerely,

Dr. Feliu, Dr. Ostios-Garcia, Dr. Garcia-Lorenzo, Dr. Villamayor, Dr. Vinal.
