

On behalf of all authors, I thank to Reviewers and Editorial Office for their comments and suggestions which helped to increase the quality of submitted manuscript.

Reviewer 1#:

Dear authors, I have read your article regarding the use of biotics in CRC cancer with great interest. This is a very comprehensive mini review, clear, with a selection a data for studies that make the manuscript very easy to read. The issues are well described, the plan is clear. My only suggestion could be if a table summarizing the most relevant bacteria related with CRC can be added.

Author's reply: We would like to thank you for your comment and suggestion. We added a Table 1 with overview of the most relevant bacteria related to colorectal cancer to the manuscript based on your recommendation.

Reviewer 2#:

In recent years, intestinal microbiota imbalance has become a research hotspot. It is of great value for the author to review the microbiota of colon cancer patients.

Author's reply: We would like to thank you for your valuable comment.
