

Dear Author, Thank you so much for your great effort. Here are my comments: Title: I suggest adding Systematic review with Meta-analysis after the title Abstract: -In methods section please add the name of the databases, MesH terms, Inclusion and exclusion criteria. -Please add PRISMA checklist for abstract as a supplement file. In Methods: In Risk of bias assessment, please cite the Cochrane Handbook and mention the version For table 4: Please mention the abbreviation below the table: N R (and do the same for all tables)

We revised our manuscript according to Reviewer #2: and Science editor,s tips.

Reviewer #2:

In methods section please add the name of the databases, MesH terms, Inclusion and exclusion criteria. -Please add PRISMA checklist for abstract as a supplement file. In Methods: In Risk of bias assessment, please cite the Cochrane Handbook and mention the version For table 4: Please mention the abbreviation below the table: N R (and do the same for all tables)

Science editor: Add the name of the database in the Methods section of the Abstract; and in the Methods section, in the assessment of risk of bias, please cite the Cochrane Handbook.
