

Dear reviewers:

Thank you for your comments on our manuscript as we believe these valuable comments will greatly improve this manuscript. Our replies are as follows:

To Reviewer #1

1. Of the 508 patients with bile duct stones, 93 (18.3%) patients had gallstone pancreatitis.
2. The data of alkaline phosphatase, aspartate aminotransferase, alanine aminotransferase, amylase, and lipase are added in the manuscript and in Table 1.

To Reviewer #2:

Thank you for acknowledging our study.
