**Language Quality:** Grade B (Minor language polishing)

**Conclusion:** Minor revision

**Specific Comments to Authors:**

This article has described the magnetic compression method for treating rectal stenosis after surgery. The authors stated this is a unique case since this method is usually applied for enterostomy. The authors have described the patient's clinical course well, and they explain how they work. This is an interesting case report; however, this article has some concerns.

Answer: Thanks for your review. Thank you also interested in this case report. In response to your question, we have made the following point-to-point reply.

1. Title: It should be considered for "after rectal cancer surgery."

Answer: Thanks for your suggestion. We added "after rectal cancer surgery" in the Title.

2. Abstract: It is fine.

Answer: Thanks for your review.

3. Keywords: Presenting a "Case report" is unnecessary.

Answer: Thanks. The "CARE Checklist" of this journal requires the keyword "Case report" to be included.

4. Background: It is fine.

Answer: Thanks for your review.

5. Case: The authors must present chemo-radio therapy for this case.

Answer: Thanks for your review. This case did not undergo chemo-radio therapy before or after rectal cancer surgery, and we added this statement to the revised manuscript. (Lines 112-113)

6. Discussion: It is fine.

Answer: Thanks for your review.

7. Figures: These are OK.

Answer: Thanks for your review.
