

Dear Editor and Reviewers :

On behalf of my co-authors, we are very grateful to you for giving us an opportunity to revise our manuscript. We appreciate you very much for your positive and constructive comments and suggestions on our manuscript.

We have studied reviewers' comments carefully and tried our best to revise our manuscript according to the comments. The following are the responses and revisions I have made in response to the reviewers' questions and suggestions. Thanks again to the hard work of the editor and reviewers!

Response to the comments of Reviewer #1:

The reviewer suggested that this article should be published. Thank you very much for the reviewers' affirmation and support for the article, which makes us feel honored and gives us the motivation to move forward. For this reason, we have made further amendments to the article under the opinions and suggestions of the editors, so that the article can be better presented to the readers.

Response to the comments of editor: After reading your suggestions for modification, I have carefully considered and sorted out your suggestions, and now my replies are listed as follows:

(1) Table(s) and figure(s): You have suggested that all legends are incorrectly formatted. We recognize that the chart is the key to the article, so that readers can more clearly and intuitively understand the content of the article. We have provided a general title and explanation for each figure. We have also provided the Figures cited in the original manuscript in the form of PPT.

(2) References: You pointed out that there are only 3 articles published in the past three years in our references. Thank you very much for your correction. To this end, we have further studied the content of the article and the views quoted. Under your suggestion, we used pubmed to find the latest highlight articles to further supplement and improve our manuscripts.

(3) Language evaluation: You said that the English-language grammatical presentation needs to be improved to a certain extent. We fully agree with

this. We have send our revised manuscript to a professional English language editing company to polish the manuscript further. They have provided a new language certificate along with the manuscript. It is hoped that the revised manuscript can meet the requirements of publication.

In your suggestions, the article still needs to be improved. We also added the author's contribution section, core tips section, "Article highlights" section, and so on as required.

We look forward to your re-review of the paper we submitted and we hope that the revised manuscript is accepted for publication.

Yours sincerely,

Hongxia Luo
