

Review comments and responses

Reviewer 1

This clinical update review is to compile evidence on the role of artificial intelligence technology in the care of diabetic foot ulcers. It is well written, and I think this manuscript is suitable for publication in the World Journal of Diabetes.

Answer: *Thanks for the positive comments. We appreciate the time and effort of the reviewer to critically analyse the paper.*

Reviewer 2

The subject of this review seems very interesting. In my opinion, this article is suitable for publication in World Journal of Diabetes, it is better for the authors to enter the letters A-D in Figure 1.

Answer: *Thanks for the positive comments. We appreciate the time and effort of the reviewer to critically analyse the paper. We have now modified the Figure and made it a multi-panel image*

Reviewer 3

This manuscript is well and good at innovation and clears the clarity of the reader. It is well structured and well written. The author does a good job of presenting a highly technical and complicated process in an easy-to-understand manner. Authors need to cross check the reference section by addressing the cited contents in the introduction and related work part. The introduction must be an extended version of the abstract. The authors must elaborate on the points highlighted on the abstract and give supportive ideas and references. The conclusions in this manuscript are primitive. Rewrite your conclusions.

Answer: *Thanks for the positive comments. We appreciate the time and effort of the reviewer to critically analyse the paper. We have now added new points in the introduction of the paper with 3 additional references. We have also modified the conclusion section of the paper to include the suggestions of the reviewer.*

Please provide decomposable Figures (in which all components are movable and editable), organize them into a single PowerPoint file.

Answer: *Power point and original figures are now provided*

Please check and confirm whether the figures are original (i.e. generated de novo by the author(s) for this paper). If the picture is 'original', the author needs to add the following copyright information to the bottom

right-hand side of the picture in PowerPoint (PPT): Copyright ©The Author(s) 2022.

Answer: *Figured are original and have no issue with copyright.*
