1.	<p>This manuscript explores the complex link between T2D and COVID-19, with a focus on the increased susceptibility of people with diabetes. The authors shed light on the role of the RAS/ACE2 mechanism in the amplification of COVID-19 infection and associated complications in type 2 diabetes. They discussed the different therapeutic strategies potentially considered as promising avenues in the fight against this pandemic. In this manuscript, the authors followed a structured methodology with a study and synthetic analysis of the functionalities linked to or resulting from this pandemic. Their discussion shows a convergence towards therapeutic practices capable of contributing to effective treatment pathways.</p>	<p>Thank you for your encouraging comments on the manuscript. Your positive feedback is deeply appreciated.</p>
