Manuscript ID: 81792
Percutaneous Management in Hepatic Alveolar Echinococcosis: A Sum of Single Center Experiences
and a brief overview of the literature

Dear Editor,

Thank you for giving us the opportunity to submit a revised draft of the manuscript. We appreciate the time and effort that you and the reviewers dedicated to providing feedback on our manuscript and are grateful for the insightful comments on and valuable improvements to our paper. We have incorporated most of the suggestions made by the reviewers. Those changes are highlighted with track changes function through the manuscript. Please see below for a point-by-point response to the reviewers' comments and concerns.

Reviewer #1:
Scientific Quality: Grade B (Very good)
Language Quality: Grade A (Priority publishing)
Conclusion: Accept (General priority)
Specific Comments to Authors: I find interest in the data reported by the authors regarding their the studies conducted. However, no in depth literature reviewing is reported, as it is stated in the title.

Response: Thank you for taking the time to review our article. Upon your suggestion, the title of the article was changed to "Percutaneous Management in Hepatic Alveolar Echinococcosis: A Sum of Single Center Experiences and a brief overview of the literature".

Reviewer #2:
Scientific Quality: Grade B (Very good)
Language Quality: Grade B (Minor language polishing)
Conclusion: Accept (General priority)
Specific Comments to Authors: accept

Response: Thanks for your time. Your comments will increase our enthusiasm.

Science editor:

The manuscript has been peer-reviewed, and it' s ready for the first decision.
Language Quality: Grade B (Minor language polishing)
Scientific Quality: Grade B (Very good)

Response: We thank you for your efforts to our editorial article.

Company editor-in-chief:

I recommend the manuscript to be published in the World Journal of Gastrointestinal Surgery. Before final acceptance, when revising the manuscript, the author must supplement and improve the highlights of the latest cutting-edge research results, thereby further improving the content of the manuscript. To this end, authors are advised to apply a new tool, the Reference Citation Analysis (RCA). RCA is an artificial intelligence technology-based open multidisciplinary citation analysis database. In it, upon obtaining search results from the keywords entered by the author, "Impact Index Per Article" under "Ranked by" should be selected to find the latest highlight articles, which can then be used to further improve an article under preparation/peer-review/revision. Please visit our RCA database for more information at: https://www.referencecitationanalysis.com/.

Response: Dear editor, first of all, we would like to thank you for taking the time to evaluate our article. We have reviewed the literature and reorganized it to further strengthen the discussion section.
