

**Manuscript number: 85145**

**Manuscript title: Intraoperative pancreas stump perfusion assessment during pancreaticoduodenectomy: a systematic scoping review.**

Dear Editor,

We thank the editors and the reviewers for their comments. Please find below a point by point response to the comments.

With kind regards,  
Francis Robertson

*Reviewer 1:*

**As a minor suggestion, a core tip should be added.**

Thanks, a core tip has now been added to the manuscript.

*Editor:*

**Please prepare and arrange the figures using PowerPoint to ensure that all graphs or arrows or text portions can be reprocessed by the editor. In order to respect and protect the author's intellectual property rights and prevent others from misappropriating figures without the author's authorization or abusing figures without indicating the source, we will indicate the author's copyright for figures originally generated by the author, and if the author has used a figure published elsewhere or that is copyrighted, the author needs to be authorized by the previous publisher or the copyright holder and/or indicate the reference source and copyrights. Please check and confirm whether the figures are original (i.e. generated de novo by the author(s) for this paper). If the picture is 'original', the author needs to add the following copyright information to the bottom right-hand side of the picture in PowerPoint (PPT): Copyright ©The Author(s) 2023.**

The figure in the manuscript is the PRISMA flow chart. This can only be downloaded in word format from PRISMA. I have copied it across to powerpoint and uploaded

this. There are no copyrights as it is from PRISMA and this has been referenced in the text.

**Authors are required to provide standard three-line tables, that is, only the top line, bottom line, and column line are displayed, while other table lines are hidden. The contents of each cell in the table should conform to the editing specifications, and the lines of each row or column of the table should be aligned.**

The table have been formatted to these guidelines.

**Before final acceptance, when revising the manuscript, the author must supplement and improve the highlights of the latest cutting-edge research results, thereby further improving the content of the manuscript. To this end, authors are advised to apply a new tool, the RCA. RCA is an artificial intelligence technology-based open multidisciplinary citation analysis database. In it, upon obtaining search results from the keywords entered by the author, "Impact Index Per Article" under "Ranked by" should be selected to find the latest highlight articles, which can then be used to further improve an article under preparation/peer-review/revision. Please visit our RCA database for more information at: <https://www.referencecitationanalysis.com/>.**

This tool has been used and is referenced in the methods. It has not added any further studies.
