Comments to the Author

It is an adequate and knowledge-adding review, carried out at the editor's invitation. I suggest reviewing the tone of some very optimistic statements in face of some statistically not so expressive results. Discussing the cost-effectiveness of treatments and suggested strategies can add value to the debate. This study contributes to the discussion of the topic.

Response: Thanks to your valuable suggestions, we have added some discussion between the cost and effectiveness of immunotherapies as shown in the revised version with underline.
