

Dear Reviewer,

Thank you for your meticulous overview of our Manuscript and suggestions you have made for its improvement. We are enclosing bullet by bullet answers to your comments. Hopefully, we have made a sufficient correction meeting the standards of the Journal and your expectations.

1 Ensure that specialized terms are defined upon their initial appearance to enhance clarity and understanding.

Thank you for this comment. We have introduced the definitions of specialized terms prior to their first appearance in the text. It has been marked yellow in the Manuscript for easy follow-up.

2 While the discussion section is thorough, primarily focusing on guidelines and literature, it is advisable to streamline the content for conciseness. Establish more direct connections with the presented case study.

Once again thank you for your suggestion. Discussion part has been rewritten more concisely and more directly to the case presented.

3 Rectify minor errors in the article, such as (Figure 3a and 3b.). Ensure there is a space before the parentheses in paper citations.

Thank you. We have made a suggested change.

4 When multiple small images are included in a single figure, standardize the order of each small image for consistency and ease of comprehension.

Thank you; we have standardized the order of images.

5 Consider adding the abbreviation for heart structures in the screenshot of the cardiac ultrasound for clarity.

Abbreviations have been added.

6 Provide appropriate explanations for the images in the legends to enhance the reader's understanding of the visual content.

Thank you for the suggestions; we have provided the appropriate explanations for the images and legends.
