

Dear Dr. Qi

Sorry about the duplications in references. According to your advice, we revised the reference list. We deleted references with number 14, 151, 140, 141, 158, 161 and 162. Because almost all reference numbers are changed, we reorganised them both in the main text and in the reference list. All changes are mentioned in the following table.

Table. Revision of references

old version	new version		old version	new version		old version	new version	
	at the main text	at the reference list		at the main text	at the reference list		at the main text	at the reference list
1	1	1	61	60	60	121	120	120
2	2	2	62	61	61	122	121	121
3	3	3	63	62	62	123	122	122

60	59	59	120	119	119	180	173	173

According to your second comment, we provided the postcode number of city Bursa as “16059” in the address line of authors and corresponder author.

In the third comment you advised us to site the tables. In our first revision, we had already cited all tables. However, they were deleted in the last version of manuscript that you sent to me. Thus, I copied these citations to the last version of the manuscript.

Table 1 is cited in at the end of the last paragraph of *Lynch syndrome*

Table 2 is cited in at the end of the last paragraph of Familial colorectal cancer type X

Table 3 is cited in at the end of the last paragraph of FAP

Table 4 is cited in at the end of the first paragraph of MAP

Table 5 is cited in at the end of the second paragraph of *Juvenile polyposis syndrome*

Table 6 is cited in in the third line of the third paragraph of *Peutz-Jeghers Syndrome*

If the manuscript required any more revisions, we will willingly perform them.

Best personel regards,

Prof.Dr. Berrin TUNCA
