

ANSWERING REVIEWERS

Oct 18, 2015

Dear Editor,

Please find enclosed edited manuscript in PDF format.

Title: The emerging role of CFTR, an epithelial chloride channel, in gastrointestinal cancers

Author: Yuning Hou, Xiaoqing Guan, Zhe Yang, Chunying Li

Name of Journal: World Journal of Gastrointestinal Oncology

ESPS Manuscript NO.: 22511

The manuscript has been improved according to the suggestions of reviewers:

1. Format has been updated.
2. Revision has been made according to the suggestions of the reviewer
 - (1) Table clarifying the impact of CFTR on different organs has been added in the manuscript as reviewer 00182891 suggested.
 - (2) We have reviewed articles describing CFTR epigenetically regulated by HDAC7 as suggested by reviewer 00182891. According to our knowledge, the researchers in that area are focusing on the protein folding and cystic fibrosis rather than cancer. So we did not add the findings from that area into our review.
3. References were corrected

Thank you again for publishing our manuscript in the World Journal of Gastrointestinal Oncology.

Sincerely yours,

Chunying Li, PhD
