

Response to reviewers

Reviewer's code: 05377710

1. There is no figure and table in the study. I suggest the author add 1 figure and at least 1 table 2. For the table, I suggest the author summary all trials registered in Clinicaltrial.gov on the Platelet-Rich Plasma versus Bone Marrow Aspirate Concentrate 3. The references are not right, please revise the reference style according to the guideline for author. 4. Although this is a review, the author should also provide the strategy of include studies. Please add a paragraph about the search studies for the review. Please read the following study and cite it: Yao X, Florez ID, Zhang P, Zhang C, Zhang Y, Wang C, Liu X, Nie X, Wei B, Ghert MA. Clinical research methods for treatment, diagnosis, prognosis, etiology, screening, and prevention: A narrative review. *J Evid Based Med*. 2020 May;13(2):130-136. doi: 10.1111/jebm.12384. Epub 2020 May 22. PMID: 32445266. 5. The author only cited 80 references; I suggest the author cite 20 more references to 100 references.

We would like to thank reviewer 05377710 for the valuable feedback. We have added a table and figure to further support the concepts that were discussed in our manuscript. We have corrected the reference list accordingly.

Reviewer 00410685

This is s revision of the current literature by experts in the field that summarize the state-of-the art on the use of PRP, BMA and BMAC in musculoskeletal disorders. I found the work easy to follow providing the essential information although, given the scientific evidence, can not reach to a conclusive evidence in favour of a specific treatment reflecting the limit of the currently available literature. Available data seems to be reported and properly commented.

We thank reviewer 00410685 for taking the time to evaluate our manuscript.
