

November 10, 2014

Dear Editor,

Please find enclosed the edited manuscript in Word format (file name: 14372-review.doc).

Title: Use of human pluripotent stem cells to study and treat retinopathies

Author: Karim BEN M'BAREK, Florian REGENT, Christelle MONVILLE

Name of Journal: *World Journal of Stem Cells*

ESPS Manuscript NO: 14372

The manuscript has been improved according to the suggestions of editors:

1 Format has been updated according to reviewers' comments: DOI and PMID were added to each citation, as well as all authors are now listed in the reference list. Citations in the text are in square brackets in superscript.

2 Typesetting were corrected in red in the text:

- Page 5: A missing bracket was added in line 13: "Unfortunately, in human embryonic development, both retinal progenitor and photoreceptor are generated relatively late (i.e. 14 and 24 weeks of gestation respectively, [17-19; 20]).".
- Page 8: line 5: "disease modelling" was replaced by "disease modeling".

I hope that our manuscript is now suitable for publication in *World Journal of Stem Cells*.

Sincerely yours,

A handwritten signature in black ink, appearing to be 'CM' followed by a long horizontal stroke.
