

Authors' Response to the Review Comments

Manuscript No: 35835
Article Title: Pursuing meaningful end-points for stem cell therapy assessment in ischemic cardiac disease
Journal Name: World Journal of Stem Cells
Corresponding Author: Dr. Micheu Miruna Mihaela
Date Sent: November 08, 2017

Dear Editor,

I am pleased to resubmit for publication the revised version of WJSC_ 35835 "Pursuing meaningful end-points for stem cell therapy assessment in ischemic cardiac disease".

We truly appreciate the time and efforts made by the editor and referees in reviewing this manuscript; their feedbacks definitely helped improving our paper.

We have replaced the full name of the abbreviation G-CSF that was by mistake written as growth-colony stimulating factor instead of granulocyte-colony stimulating factor. Another aspect modified in the manuscript is the bibliography as three of the cited publications were named twice with different indices. As for the image presented in the article we also made modifications in order to improve its format and resolution.

In consequence, we have addressed all issues indicated in the review report, and believe that the revised version can meet the journal publication requirements.

We look forward to hearing from you regarding our submission. We would be glad to respond to any further questions and comments that you may have.

Dr. Miruna Micheu
