

Reviewer comments

<p>However, the quality of the English language of the manuscript does not meet the requirements of the journal. Before final acceptance, the author(s) must provide the English Language Certificate issued by a professional English language editing company.</p>	<p>Thank you for the suggestion. We have submitted a certificate from a professional language editor.</p>
<p>This letter to the editor is a response to previously published articles related to upper gastrointestinal bleeding. The authors discuss the esophageal bronchial artery fistula, a rare serious cause of upper gastrointestinal bleeding, which is novel. The authors summarize some cases and treatment options, which are of some significance to the clinical field, attracting the attention of readers. However, the number of total references is a bit outdated, maybe the authors should update a little more related references.</p>	<p>Thank you for the suggestion. We have removed the references older than 2010 and replaced them with current ones.</p>
