Dear the editor of World Journal of Gastrointestinal Endoscopy

My ID: 00028039

Thank you very much for reviewing our manuscript entitled: **Flexible robotic endoscopy for treating gastrointestinal neoplasm** in World Journal of Gastrointestinal Endoscopy.

We would like to resubmit the enclosed manuscript for the publication in World Journal of Gastrointestinal Endoscopy.

I believe that this review will serve to reveal current status and future issues in the development of a therapeutic flexible endoscopic robot and prove interesting to the readers of your journal.

I hope you will give favorable consideration to this manuscript and find the article acceptable for publication in your journal.

Sincerely yours,

Keiichiro Kume, M.D., PhD

Author's Response to Decision Letter

Point-by-Point-Reply

We wish to thank you for your helpful comments on our manuscript. Our replies are as follows.

REVIEWER'S COMMENTS TO THE AUTHOR

Reviewer: 1

- (1) We have added according to your suggestion.

Figure 1. Endoscopic therapeutic robot system (ETRS)

Figure 2. Endoscopic Operation Robot (EOR) version 3

I asked each author to provide pictures of their systems, but no pictures were available other than the ones I provided.

- (2) I added the abbreviations as you suggestion.

- (3) The underline is my mistake, so I deleted it.

"EndoMASTR EASE" is an official name, not an abbreviation (Gastrointest Endosc 2021; 93: 1172-117.7). Also, "EASE", which will be described later, is a different system.

EDITORS' COMMENTS TO THE AUTHOR

Since the corrections from the first draft are minor, such as adding abbreviations and figures, we have not further polished the language. The first draft meets the publication requirements of grade A.
