The manuscript has been improved according to the suggestions of reviewers:

1 English language was improved

2 Revision was made according to the suggestions of the reviewers and editor

- corrections on names and institution identifications, figure legends and core tip
- alteration on the name of the manuscript to **Duodenal adenoma surveillance in patients with familial adenomatous polyposis**
- legends of Figures 1 and 3 were corrected to include proper staging.
- I think the absence of capture date is not so important and won't lead to any suspicion by a critic reader. All figures are from different patients.
- The suggestions regarding phrases modifications were all accepted (and phrases were modified and one sentence was extracted)
