

**Rectifications:**

Name of journal: *World Journal of Gastrointestinal Endoscopy*

ESPS Manuscript NO: 13663

As the reviewers proposed we have made some changes in our publication:

- First of all, we have changed the title of the article, taking the title proposed by the reviewers.
- In the introduction and in the rest of the text, we have removed several unnecessary phrases because we repeated the same content already appointed.  
This occurs in pages 2 (introduction, paragraph 1), page 3 (endoscopic therapy for achalasia, paragraph 1), page 6 (dilation with rigidflex balloon, paragraph 1), page 8 (Pneumatic dilation versus laparoscopic Heller Myotomy, paragraph 1), page 13 (therapeutic management algorithm, paragraph 3).
- We propose, as our reviewer said, change the point of view of the use of POEM, indicating this as a present option, not as a future (page 11, Peroral endoscopic myotomy, paragraph 2).
- At last, we corrected several orthographic errors in text, and at references, and changed some error of cited publication (change in reference 81, because it was duplicate, and corresponding changes in text citation).
