Number ID	Review Info	Specific Comments To Authors	Specific Comments To Authors (File)
02944278	<b>Conclusion:</b> Accept (General priority) <b>Scientific Quality:</b> Grade A (Excellent) <b>Language Quality:</b> Grade B (Minor language polishing)	Extremely interesting management of advanced and unresectable disease. Very interesting. It is just a case report but it could be an idea for further studies on aggressive therapy of hcc	
02734287	<b>Conclusion:</b> Accept (General priority) <b>Scientific Quality:</b> Grade A (Excellent) <b>Language Quality:</b> Grade A (Priority publishing)	This is a valuable case report showing positive effects of MDT in the treatment of HCC. HCC is a disease where multidisciplinary work is particularly important and can lead to good outcomes even in complex and poor prognosis cases such as this one. The report is an example of excellent multidisciplinary work using complex therapies with a favourable outcome.	

Response to reviewers:

We appreciate the reviewers time to review our manuscript. We have made modifications to our language for smoother reading.
