

Dear Editor and Reviewers,

Thank you for the opportunity to submit a revised review article titled “**De novo and recurrence of Metabolic Dysfunction-Associated Fatty Liver disease after liver transplantation**” to the World Journal of Hepatology. I appreciate the time and effort that the reviewers have dedicated to provide your valuable feedback on our manuscript.

Response: We have added the role of ARFI- based techniques (pSWE and 2D-SWE) on page 10 and page 13 under fibrosis section. We highlighted the sentences that we added. We added a table to summarize management strategies, and a figure to overview the approach, risk stratification, diagnoses, and management in a simplified diagram.

Sincerely,

Nikolaos T. Pyrsopoulos, MD, PhD, MBA, FACP, AGAF, FAASLD, FRCP (Edin)
