Editor-in-Chief

World Journal of Hepatology

Manuscript title: "**Lean Body Mass Index is a Marker of Advanced Tumor Features in Patients with Hepatocellular Carcinoma**"

Dear Sir/Madam:

Thank you for the helpful reviewer comments and the opportunity to submit a revised manuscript.

I have changed the title of the manuscript as above to reflect the reviewer's comments. A multivariate model was performed to identify risk factors for survival as suggested and a new Table 3 is included with relevant variables. I will be happy to adjust any data needing SI units but request further clarification on which data need units added.

Sincerely,

Andrew deLemos, MD
