

The Editor  
World Journal Hepatology

15<sup>th</sup> June 2014

Dear Editor

RE (ESPS Manuscript NO: 11451)

We wish to submit a further revised version of our paper to the journal :

Difficulties in diagnosing acute kidney injury post liver transplantation using serum creatinine based diagnostic criteria

In answer to the specific comments made by the editors

Reviewer 1

This review article described the disadvantage of using serum creatinine in evaluating the acute kidney injury in patients after liver transplantation and provided surrogate markers as well. Major points The text need to be carefully re-edited, for example: the correct use of ‘.’, ‘,’ and space, etc., the capitalized letters in several word, etc.

As requested we have ran a grammatical check

he references should be formatted using standard software and consistent format as the journal requested. Of important, references need to be updated.

As requested we have formatted the references and added updates

Table 1 and 2, the abbreviation of ‘ Renal replacement therapy (RRT)’ should be placed under the table instead in the title. Other abbreviations for ‘R,IF’ should also be provided.

As requested we have altered table 1 and table 2

Figure 1, was data from authors own? Otherwise, should be cited and used with permission.

This was from our own internal audit data. We have made this more explicit.

Reviewer 2

No comments

Yours sincerely
