Minor comments Please check spelling and grammar, examples Page 4: “....There is some debate about the better route to perform the liver biopsy given that patient with ESRD..” should be “...There is some debate about the better route to perform the liver biopsy given that patients with ESRD...” “Once transplanted this risk disappears with the restoration on normal renal function” Should be “Once transplanted this risk disappears with the restoration of normal renal function” Title of Table 1 should be: Table 1: Dosage Adjustment of Nucleos(t)ide Analogue for Patients with Reduced Creatinine Clearance. All these issues were corrected (Highlighted in the text in Yellow)

The reviewer suggest to include the paper " Impact of pre-existing hepatitis B infection on the outcomes of kidney transplant recipients in the United States. (Clin J Am Soc Nephrol. 2011 6(6):1481-7)". This work was included in Fabrizi's meta-analysis (Ref 26 in the publication). The meta-analysis is conclusive and including one work showing different results does not add any information.
