Dear Editor,

Please find enclosed the edited manuscript in Word format (file name:15632).

Hepatitis B among Inuit

A review with focus on Greenland Inuit

Author: Karsten Fleischer Rex, Stig Andersen, Henrik Bygum Krarup

Name of Journal: *World Journal of Gastroenterology*

ESPS Manuscript NO: 15632

The manuscript has been improved according to the suggestions of reviewers:

Reviewer's comments: "this paper is an interesting narrative review on a very special population such as Inuits people. I think that the paper contain several interesting information worthy of being published."

Thank you for your helpful comments.

I think that the paper would be improved (minor revision) if authors could find/provide:

1. more recent data about co-infection and HCC (all data reported are quite old, in fact i could find very few recently published data)"

Two more recent references concerning this have been added to the section"Co-infection with HBV and, HDV, HCV or HIV". Please see the new reference list.

"2. most detailed information about vaccinal coverage in Alaska/Canada/Russia.

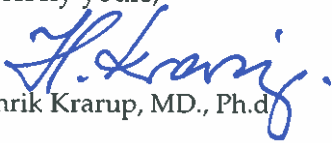

Up to date information on vaccination has now been inserted in the section "Vaccination and monitoring of HBV" and the reference list has been revised.

3. A paragraph on which they state what they think are the best and most feasible action to be undertaken in Greenland in the next future.

A paragraph on "Future Assesment" in Greenland has now been added.

Thank you again for publishing our manuscript in the *World Journal of Gastroenterology*.

Sincerely yours,

Henrik Krarup, MD., Ph.d
