COMMENTS TO AUTHORS

The letter offers an up-to-date point of view on the potential of IL-28B genetic testing for IFN based HCV therapy in Pakistan. However, English should be revised by a native speaker as some punctuation and grammar mistakes makes the text hard to follow sometimes. It could be interesting to add some brief epidemiological background to justify the relevance of this theme in the population of Pakistan.

Answer: The revision is done in the main body of the manuscript and revised part is highlighted in yellow color.
