

Answering reviewers

We would like to thank the reviewers for their interesting comments.

Reviewer 1 (00054001): The authors should show the table (s) describing a summary of the previous significant reports... »

We thank the reviewer for his/her comment and his/her constructive remarks.

We have added a table (table 1; page 6 line 154) to cite the main articles on alcohol relapse after liver transplantation.

Reviewer 2 (00054465): “An excellent review”

Thank you very much for this comment.

Reviewer 3 (00054120):

- 1) The article requires be reviewing, editing-speaking person to correct grammar and spelling mistakes”**

We have had this article corrected by a native English speaker who works as a fully qualified medical translator (See certificate).

- 2) Re-organize the paper to reflect its aim**

Thank you for this remark. We have reformulated the plan more clearly in the introduction (page 4, line 99) and we have insisted on post-transplantation substance consumption and treatment.

We have divided the document into 2 separate parts: the first “Psychoactive substance consumption after liver transplantation” (alcohol, tobacco, other psychoactive substances) and the second “Treatment of addictive behaviors in liver transplantation recipients”.

- 3) The authors have to give clear suggestion... and based on their institutional practice”**

We have added a paragraph about addictological care in our LT center (page 9, line 240).
