Dear Editor,

Please find enclosed the edited manuscript in Word format (file name: 4067-revised).

Title: Non-dietary Forms of Treatment for Adult Celiac Disease

Author: Hugh James Freeman

Name of Journal: World Journal of Gastrointestinal Pharmacology and Therapeutics

ESPS Manuscript NO: 4067

The manuscript has been improved according to suggestions of reviewers:

Format updated (Book Antiqua, 1.5 line spacing, 12 pt), including references in superscript with []; core tip added.

2. Revisions made according to suggestions of reviewers:

- (1) text added as suggested related to lymphoproliferative disorders in final paragraph of the manuscript with 3 more references (#38 to #40);
- (2) reference #30 (now #32) updated to final article with all authors;
- (3) text changed as suggested to “showed a reduction of symptoms and autoantibodies”.
- (4) text comment added regarding other non-dietary treatments of celiac disease, specifically steroids, particularly in those not fully responding to gluten-free diet;
- (5) Use of serological markers, including HLA-DQ2/8, has been promoted by ESPGHAN, particularly for pediatric age group and may be sufficient. Both references to ESPGHAN added (see #3 and #4).

(6) References revised for journal style with capitalized first author, italicized journal title and PMID numbers. Reference #6 updated from “in press” with added volume and page numbers.

3. References and typesetting corrected.

Thank you again for publishing this manuscript in *World Journal of Gastrointestinal Pharmacology and Therapeutics*.

Sincerely yours,

Hugh James Freeman, MD
