Manuscript Title : Does the use of CT scenogram alone enable diagnosis in cases of bowel obstruction?

Dear Editor,

Thank you for giving us the opportunity to submit a revised draft of the manuscript. We appreciate the time and effort that you and the reviewers dedicated to providing feedback on our manuscript and are grateful for the insightful comments on and valuable improvements to our paper. We have incorporated most of the suggestions made by the reviewers. These changes were highlighted by the trace changes function through the manuscript and are also mentioned in order below.

Reviewer #1:

**Yazarlara Özel Yorumlar:** sevgili Yazarlar. bunlar çok önemli veriler ama bu şüpheli teşhisin erken belirtilerini bilmiyorum. Bu da erken teşhis açısından çok açık ve önemli bir veridir. Lütfen bunu açıklayabilir misiniz, cinsiyet farklılıkları var mı? Teşekkür ederim

1-Additions of "Closed degloving injury" and "pediatrics" in keywords and wording changes as "Morel-Lavallée lesion" were made.

2-The specified typos have been corrected. For example:

Mri:MRI,DISCUSSION:Discussion,İn:In,theis:their ,could not bu: could not be, tiny:small.

3-The expression in the material and method section has been changed as “The monitoring of fat accumulations in a single section in the collections was deemed sufficient to meet the Morel-Lavelle criterion (Figure 3).”
