

## ANSWERING REVIEWERS

December 30th, 2013

Dear Editor,

Please find enclosed the edited manuscript in Word format (file name: Manuscript.doc).

**Title:** Cost-effectiveness of Fluorine-18-Fluorodeoxyglucose positron emission tomography in tumours other than lung cancer: a systematic review

**Author:** Salvatore Annunziata, Carmelo Caldarella, Giorgio Treglia

**Name of Journal:** *World Journal of Radiology*

**ESPS Manuscript NO:** 7081

The manuscript has been improved according to the suggestions of reviewers:

- 1) values of cost-effectiveness about studies by Sher and Rebelais were pointed out in the text of the manuscript;
- 2) discussion have been improved, resuming the considerations of the authors about cost-effectiveness of FDG-PET for each indication in oncology; no statistical analysis was performed cause of the type of article proposed (systematic review): further studies could statistically analyze quantitative values of each study included in our review.

Thank you again for publishing our manuscript in the *World Journal of Radiology*.

Sincerely yours,

Salvatore Annunziata, MD, PhD
