

May 25, 2014

Dear Editor,

Please find enclosed the edited manuscript in Word format (file name: ESPSManuscript 10535-Review.doc).

Title: Bilateral Squamosal Suture Synostosis: A rare form of isolated craniosynostosis in Crouzon Syndrome

Author: Yasmeen K Tandon, MD, Michael Rubin, MD, Mohamed Kahlifa, MD, Gaby Doumit, MD and Lena Naffaa, MD

Name of Journal: *World Journal of Radiology*

ESPS Manuscript NO: 10535

The manuscript has been improved according to the suggestions of reviewers:

1. The paragraph of etiologies and genetic mutations in the introduction was moved to the discussion
2. The role of MRI in the diagnosis of craniosynostosis was discussed.
3. In Figure 2, the region of the squamosal suture is demonstrated by arrows.
4. Further details and follow up on the planned surgical correction of the bilateral squamosal synostosis was discussed.
5. The differential diagnosis with other craniosynostosis syndromes such as Apert's syndrome was discussed. Common features and differentiating features were also described.

Thank you again for publishing our manuscript in the *World Journal of Radiology*.

Sincerely yours,

Yasmeen K Tandon, MD
