

May 3, 2014

Dear Editor,

Please find enclosed the edited manuscript in Word format (file name:10116-review.doc).

Title: MRI CORRELATES OF BEE STING INDUCED MULTIPLE ORGAN DYSFUNCTION SYNDROME (MODS): A CASE REPORT.

Author: Sushant K Das, Li C Zeng , Bing Li , Xiang K Niu, Jing L Wang, Anup Bhetuwal, Han F Yang*.

Name of Journal: *World Journal of Radiology.*

ESPS Manuscript NO: 10116

The manuscript has been improved according to the suggestions of reviewers:

1 Text has been reviewed for any English grammatical error.

2. Revision has been made according to the suggestions of the reviewer,

(A) The statement MRI is the best modality assessing patient presented with Multiple Organ Dysfunction has been edited.

(B) The reason for increased cardio-thoracic ratio on chest radiograph has been discussed as well as effect of hypertension on cardio-thoracic ratio has been ruled out owing to its short history (Patient had no prior history of HTN. Rather, we assume it to be due to myocardial edema secondary to myocarditis.)

3 References and typesetting are rechecked.

Thank you again for publishing our manuscript in the *World Journal of Radiology.*

Sincerely yours,

Sushant k. Das.
