

23 July 2013

Dear Editor,

Please find enclosed the edited full-text manuscript in Word format (file name ESPC Manuscript No: 4508.doc).

**Title:** Part III: Coronary CT angiography: Dose reduction strategies

**Author:** Akmal Sabarudin, Zhonghua Sun

**Name of Journal:** World Journal of Cardiology

**ESPS Manuscript NO:** 4508

The manuscript has been improved according to the suggestions of reviewers:

1. Format has been updated

2. Revision has been made according to the suggestions of the reviewers:

- This is an excellent review about acute coronary syndrome. I think this manuscript is nicely structured and well written. I have no question about this manuscript.
- This is a well written review of useful techniques to reduce radiation during CT angiography. As a reader I miss a resume Table showing the main tools to reduce radiation, the % of reduction and the pitfalls of each technique.

*Response: A table has been provided to summarise these main tools for dose reduction with percentage of dose reduction being provided.*

Thank you again for publishing my manuscript in the *World Journal of Cardiology*.

Sincerely yours,

Zhonghua Sun, PhD
