

February 6th 2014

Dear Editor,

Please find enclosed the edited manuscript in Word format (file name: 8475-review.doc)

Title: Invasive Strategy in Patients with Resuscitated Cardiac Arrest and ST Elevation Myocardial Infarction

Author: Vojka Gorjup, Marko Noc, Peter Radsel

Name of Journal: World Journal of Cardiology

ESPS Manuscript No: 8475

The manuscript has been approved according to the suggestions of the reviewers:

1. Reviewer: did not suggest any changes.
2. Reviewer: revision was made according to the suggestions of the reviewer. References and typesetting were corrected. However we could not change table 1 as data like bystander CPR and time to BLS is not available for most of the studies mentioned.
3. Reviewer: we added additional reference to statement. Concerning length of review, we think longer discussion would not add any additional value to the article.

We also corrected article title and added PMID and DOI to references as suggested by You.

We chose not to send our manuscript to English language editing company. After being reviewed by English native speaker physician we think it has reached Grade A.

Thank you again for publishing our manuscript in the World Journal of Cardiology.

Sincerely yours,

Peter Radsel, MD, PhD
