Room 1701, 17/F, Henan Building, No. 90 Jaffe Road,  
Wanchai, Hong Kong, China

Sub: Submission of revised manuscript.

Name of journal: World Journal of Cardiology

Manuscript NO.: 29459

**Respected Editor-In-Chief,**

It gives me great pleasure to continue my academic work with World Journal of Cardiology as a contributing author as well as a reviewer and a member of the editorial board of WJP.

Here we gladly submit our revised manuscript, now titled '**CARDIAC BIOMARKERS IN PEDIATRIC HEART DISEASE : A STATE OF ART REVIEW**' which was previously titled 'Pediatric Heart Failure And Biomarkers : A State Of Art Review'.

We thank you and all the reviewers for very thoughtful review and valuable suggestions.

We have made a sincere attempt at answering all the questions of the reviewers as well as made changes.

Based on the reviewers, we have changed the title of the review to better reflect the content. We appreciate the suggestion.

As per one of the reviewer, we have included a table to summarize the biomarkers discussed.

Per reviewers, we have clarified that the review predominantly deals with BNP as there is preponderance of data in pediatrics. However, other biomarkers that are pertinent, with pediatric or adult data have been reviewed.

Based on your suggestion, the core tip, the audio core tip has been added. We have reformatted the references in the text as well as the bibliography to include doi where available.

We hope that all of these changes adequately reflect the expectation of the journal. We sincerely believe that the readers will find the review useful.

Again, the contributing authors have no conflict of interest and no financial disclosures.

I will be happy to answer any questions related to the submission.

Looking forward to your review and positive outcome.

Thank you,

Sincerely,

Shriprasad R. Deshpande
