To the Editor  
World Journal of Cardiology

n.ID 03500309

Dear Editor,

Thank you again for considering our paper “Brugada type 1 ECG pattern: should we treat the electrocardiogram or the patient?”.

I have carefully read the peer-review report and I have addressed all points raised. To fulfil the recommendation of Reviewer 00214305 to emphasize more on poliparametric approach for risk stratification, we have introduced a new paragraph and partially modified the text. In addition I have introduced 3 figures and eliminated 2 tables.

Sincerely yours

Pietro Delise, MD

#### **Reviewer 0025135**

Thank you for your comments. In this rewieved version we have have introduced a new paragraph and partially modified the text emphasizing the usefulness of poliparametric approach for risk stratification. In addition we have introduced 3 figures and eliminated 2 tables.

We hope that that paper is now better

#### **Reviewer 00214305**

Thank you for your comments.

To fulfil your recommendation to emphasize more on poliparametric approach for risk stratification, we have have introduced a new paragraph and partially modified the text. In addition we have discussed the paper of Sieira. Finally we have introduced 3 figures and eliminated 2 tables.

We hope that that paper is now better
