Minor revision. I suggest you the drawing of a table summarizing the positive and negative points of the assessment tools – thank you for suggesting this edit. We added a new table (new Table 9) into the manuscript which summarizes current objective response criteria and shows their advantages and disadvantages. (Old Table 9 is now Table 9).

Furthermore, in the Introduction section, in the part “it is serves”, the word “is” should be removed – thank you for suggesting this edit. The word “is” has been removed.
