1	Please resolve all issues in the manuscript based on the peer review report and make a point-by-point response to each of the issues raised in the peer review report, and highlighted the revised/added contents with yellow color in the revised manuscript.	We have made major changes, English correction included, so we upload the file with comparison – file before and after corrections (file name: '89904-Manuscript – changes').
2	1. The figures and tables must be sequentially numbered and referred to in the text at the points where their content is discussed.	Done
3	2. The manuscript contains several errors in English that need correction: In "Case Presentation," third paragraph, second line, the placement of the abbreviation "(MRI)" seems incorrect. In the same section, sixth paragraph, fifth line, the article "A" is extraneous and should be removed. In the "Procedure" section, first paragraph, fifth line, the fragment "bserved" is evidently a typographical error and should be corrected to "observed." In Table II, the term "Observation" is misspelled; it should be amended to "Observation" in both occurrences.	Done
4	3.Despite being low-grade, this disease may prompt early recurrence or distant metastasis, leading to premature mortality. The authors are encouraged to elaborate on their views or theories explaining this disease's aggressive behavior.	Done
5	4 LANGUAGE POLISHING REQUIREMENTS FOR REVISED MANUSCRIPTS SUBMITTED BY AUTHORS WHO ARE NON-NATIVE SPEAKERS OF ENGLISH Authors are requested to send their revised manuscript to a professional English language editing company or a native English-speaking expert to polish the manuscript further.
