Dear Yuan Qi,

Science Editor, Editorial Office WJCO.

**Re: Article RE-submission to World Journal of Clinical Oncology**

**Review article (ID (02677743); Manuscript No. 8196**

Thank you very much for your attention and the suggestions/efforts performed by the reviewers related to our article “Immediate Nipple-Areola-Sparing Mastectomy Reconstruction: An Update on Oncological and Reconstruction Techniques”.

As you suggested, we revise the manuscript. The manuscript has been improved according to the suggestions of reviewers:

- 1. The article was edited by the professional English proofreading.*
- 2. The Figure 1, H was changed and now the Wise pattern was included.*
- 3. The legend of the figure 4 was changed in order to include the explication about the final circumareolar incision. The superior periareolar incision was converted to a total circumareolar incision in order to achieve a better symmetry during the second stage of reconstruction.*
- 4. The legends of figures 2-5 were revised and now are more formal as legend of the figure 1 as suggested by the reviewer.*

Thank you again for publishing our manuscript in the WJCO.

Sincerely yours,

We look forward to receiving your opinion.

**Alexandre Mendonça Munhoz, MD.**
